

How to attach your board on a Flysurfer kite bag

In case you have wondered ... here a little update on how to comfortably transport the board attached to your kite bag. There is an extra strap at the side pocket of your kite bag. Find instructions on how to use it for board transportation below.

Take out the extra strap from the pocket on the side

Lose attached strap

Attach extra strap at its place

Lead strap through handle or any other position you like

The ideal position to safely transport your board is to attach it centrally

Voila! Have a great kite day!
